FEATURES & BENEFITS

- **Efficient two-stage snow blowers**
- **The blower fan and auger are equipped with direct drive hydraulic motors, eliminating high wear parts such as belts, chains, and gear boxes**

The snow blower is an efficient method to remove large amounts of snow from sidewalks, roads, or other large areas when snow needs to be spread out evenly. The two-stage blower provides a powerful and efficient snow removal tool, even if the snow is wet and heavy. To achieve this efficiency, the auger breaks up the snow and the fan throws the snow out of the discharge chute. The chute can be rotated 200° from the operator's seat, with the discharge chute height angle manually adjusted.
