

TREE SHAKER WITH COLLECTOR

<http://tiny.cc/treeshaker>

FEATURES & BENEFITS

- Total control of vibration frequency (up to 40 Hz)
- Operates on trees with wide trunk
- Harvest collector, 6 m (19.5 ft)

The tree shaker attachment incorporates the most advanced harvest technology for olives, almonds, nuts, pistachio, etc. The shaker requires a minimum distance of 70 cm (27 in) from the soil to the foliage. The adjustable vibration frequency maximizes the effect on the fruit, avoiding low frequency vibrations on the trunk. Depending on ground conditions, as many as 40 to 60 trees can be processed per hour. The hydraulically controlled collector has a diameter of 6 m (19.5 ft), capturing fruit from large trees. The tree shaker clamp swivels to accommodate uneven ground levels.

The shaker vibrating head is powered by a compact hydraulic motor. The shaker's controls are located near the operator's seat, and controls all movements and vibration frequency.

Model	Trunk diameter	Capacity	Diameter	Weight	Code	Price
Shaker vibrating head	0-35 cm (0-13.8 in)	/	/	330 kg (727 lbs)	C891000	
Collector	/	540 kg (1190 lbs)	6 m (19.7 ft)	180 kg (397 lbs)	C891001
